ABOUT ME

I am Thien (David) Vuong Huu, a UX/UI Designer from Vietnam with over 7 years of experience, including 3 years as a Full-Stack Developer. My technical background in Angular 2+, .NET, and various UI frameworks such as Material UI, SCSS, Tailwind CSS, Prime NG, Kendo UI, Chakra UI, and Bootstrap allows me to create intuitive and highly functional, responsive designs. Over the past 4 years, I've specialized in UX/UI design, working with tools like Miro, Figma, and Illustrator. My dual experience bridges development and design, optimizing workflows and improving efficiency. For example, in an Australian government project (HBCF), I helped reduce workflow by over 20% by developing UX solutions, minimizing system errors, and reducing bug-fixing time. In addition, I also participate in supporting the Figma community. More than 16.000 designers are using my designs.

EDUCATION

2015 - 2019

EXPERIENCE

NewOcean Information System

NOIS Company Limited

Sep 2021 - Present

TEAM LEADER UX/UI DESIGNER & FRONT END DEVELOPER

- Designed over 10 large projects across various fields, including restaurants, eateries, banking, insurance, employee management, warehouse management, ...
- Improved workflow efficiency by more than 20% for the HBCF project, an Australian government insurance initiative management project, by optimizing the design process and implementing effective UX strategies.
- Redesigned interfaces across multiple projects to enhance performance and user engagement.
- Created over 400 components and 3000 design screens, accelerating development speed and providing a solid foundation for future projects.
- Provided guidance and training for new UX/UI employees joining the company.
- Led a team of UX/UI designers and front-end developers to deliver high-quality, user-centered designs.
- Coordinated and managed project progress, ensuring timely completion of design and development tasks.
- Implemented innovative UX/UI solutions using tools like Figma, Miro, and Illustrator, enhancing user experience and engagement.
- Developed responsive front-end interfaces with Angular 2+, SCSS, and Bootstrap, ensuring cross-platform compatibility and performance.
- Worked closely with backend developers to seamlessly integrate UI components and improve overall functionality.

Sep 2018 - Sep 2021

UI DESIGNER & FULL-STACK DEVELOPER

- Designed and developed user interfaces for TPOS, a comprehensive POS system, enhancing usability and customer experience.
- Implemented UI solutions for TDental, a dental clinic management system, ensuring a seamless and user-friendly interface.
- Collaborated with cross-functional teams to integrate backend and frontend functionalities, optimizing system performance and reliability.
- Utilized technologies such as Angular, .NET, Kendo UI and Bootstrap to develop responsive and scalable web applications.
- Conducted user research and usability testing to inform design decisions and improve user satisfaction.
- Streamlined development processes by creating reusable components and modules, reducing development time and effort.
- Provided technical support and maintenance for both TPOS and TDental, ensuring smooth operation and addressing user issues promptly.

Dec 2017 - July 2018

FRONT END DEVELOPER

- Develop responsive web interfaces for diverse client projects, ensuring cross-browser compatibility.
- Translate UX/UI designs into high-quality code using HTML, CSS, JavaScript, PHP and Drupal 8.
- Optimized website performance by implementing best practices in coding, reducing load times, and enhancing overall user experience.
- Collaborated with backend developers to integrate front-end components seamlessly.
- Stayed up-to-date with the latest trends and technologies in front-end development to continuously improve skills and deliver cutting-edge solutions.
- Provides reviews and solutions for an automatic website creation system using Drupal 8 without coding.

OTHER EXPERIENCE

Jun 2017 – Mar 2022

TEACHER

- I teach Robotic, Scratch, Tynker, Makecode Minecraft, Python, HTML, CSS, JS, Arduino, Photoshop, Illustrator.
- Programming training for students to participate in domestic and foreign programming competitions.
- Training STEAM Education teachers for international standard schools and universities.
- Write STEAM education curriculum according to international standards for schools and educational centers.

ACHIEVEMENTS

1.650 Reputation on Stack Overflow: <https://stackoverflow.com/users/12569619/>

235+ Small projects on Stackblitz: <https://stackblitz.com/@vuonghuuthien>

16.000+ Designers use my designs on Figma Community: <https://www.figma.com/@vuonghuuthien>

MY PORTFOLIO

PROJECTS

<https://www.icare.nsw.gov.au>

USER RESEARCH & UX DESIGNER

Currently, I am helping develop iCare's Home Construction Compensation Fund (HBCF) platform. A project of the Australian government. This user-friendly online tool will help New South Wales (NSW) homeowners easily find information and access services related to construction compensation.

The HBCF project is all about streamlining the homeowner and builder experience when it comes to the insurance and claims processes handled by iCare NSW. We are building a smooth, intuitive interface that eliminates the complexity of insurance procedures.

<https://appsure.com.au/>

USER RESEARCH & UI/UX DESIGNER & ANIMATOR

Appsure is a powerful, flexible, and user-friendly insurance management application developed for Appsure, an Australian company. The application helps insurance companies optimize their processes, enhance customer experience, and manage data effectively. This comprehensive system supports various functionalities for different user roles, ensuring efficient operation and interaction across the insurance workflow.

<https://nois.vn/>

FRONT END DEVELOPER & UI/UX DESIGNER & ANIMATOR

Redesign of the NOIS website. The project aims to create a fresh, dynamic, and modern look. Helping to increase brand recognition.

UI/UX DESIGNER

A software solution designed for multinational corporations to manage, guide, and evaluate employees across various offices worldwide. The system encompasses five main workflows: Director Country, Director Office, Manager, HR, and Employee.

UI/UX DESIGNER

Line View GMI is a comprehensive project that includes both a website and a mobile application. It is designed to manage large-scale data related to questions and answer choices. The system supports various functionalities for different user roles, ensuring efficient data handling and user interaction. This project can be applied to multiple scenarios, such as competitions, surveys, market research, academic research, customer feedback collection, and any other activities involving questions and data analysis.

UI/UX CONSULTANT & FRONT END DEVELOPER

The Juicy Burger project involves designing a comprehensive website and mobile application for Juicy Burger, a chain of fast food restaurants with multiple branches. The goal is to create an engaging, user-friendly digital presence that enhances the customer experience, streamlines operations, and promotes brand loyalty.

PROJECTS

FirstBank Web & App

<https://www.firstbankonline.com/>

FRONT END DEVELOPER & UI/UX DESIGNER & ANIMATOR

First Bank's website software and mobile applications aim to provide a modern, convenient and secure banking experience for customers. Features are designed to meet diverse needs, from basic daily transactions to complex financial services, helping customers manage personal finances effectively and save time.

TPOS

<https://tpos.vn/>

UI DESIGNER & FULL STACK DEVELOPER

The TPOS project involves designing and developing a comprehensive sales management software and mobile application that helps users manage all business activities in stores and online sales effectively, facilitating rapid and continuous sales growth.

TDental

<https://tdental.vn/>

UI CONSULTANT & FULL STACK DEVELOPER

The TDental project involves designing and developing comprehensive software and a mobile application to manage all activities at a dental clinic, including patient management, doctor scheduling, laboratory coordination, supplier interactions, and revenue and expenditure tracking. Additionally, the system provides automated customer care.

GRIT Assistant

UI/UX CONSULTANT

This schedule management and goal-setting app is designed to help users manage their time efficiently and achieve their goals effectively. With features supporting both individual productivity and team collaboration, the app aims to enhance overall productivity, ensuring that users can plan, track, and accomplish their tasks and objectives seamlessly.

Tai Vuong Furniture

FRONT END DEVELOPER & UI/UX DESIGNER

Tai Vuong Furniture aims to provide a comprehensive and enjoyable shopping experience for customers looking to furnish their homes. With a wide selection of products, user-friendly features, and robust backend support, the website is designed to meet the needs of modern consumers seeking quality furniture.

E-Chat

Chat App

USER RESEARCH & UI/UX DESIGNER

This chat app is designed to facilitate easy, secure, and efficient communication among users. With a focus on privacy, customization, and additional functionalities like multimedia messaging and group calls, the app aims to provide a comprehensive communication platform for both personal and professional use.

Food Delivery App

USER RESEARCH & UI/UX DESIGNER

Speedy Chow is designed to provide users with a fast, reliable, and enjoyable food delivery experience. By offering a wide range of restaurants, easy ordering processes, secure payment options, and real-time tracking, Speedy Chow aims to become the go-to app for food delivery needs.

VPN App

USER RESEARCH & UI/UX DESIGNER

Fast VPN is designed to provide users with a secure, private, and unrestricted internet experience. By offering advanced security features, user-friendly interfaces, and reliable performance, Fast VPN aims to be the go-to solution for online privacy and freedom.

Plant App

USER RESEARCH & UI/UX DESIGNER

The Plantum app is designed to be a comprehensive resource for plant lovers, providing everything from plant shopping to care guides and disease diagnosis. The Plantum app aims to make plant care easy, fun and accessible for everyone.
